

The Boston chapter of Spanish Scientists in the USA  
([ECUSA](#), Españoles Científicos in the USA)  
in collaboration with the [Real Colegio Complutense at Harvard](#),  
is pleased to invite you to a special seminar

**“The Neglected Majority:  
Using Invertebrates to Study Evolution, Phylogeny and  
Biogeography”**

**Wednesday, January 14, 2015 from 6:00 to 7:30 pm**

Real Colegio Complutense  
26 Trowbridge St, Cambridge, 02138 MA

This program has been made possible in part thanks to the generous support of

**FUNDACIÓN  
RAMÓN ARECES**

Our speaker is [Gonzalo Giribet](#), the Alexander Agassiz Professor of Zoology and Curator of Invertebrates in the Museum of Comparative Zoology and Professor of Organismic and Evolutionary Biology at Harvard University.

This free public lecture will highlight how invertebrate animals can be used as model organisms to understand ancient biogeographical events, connectivity among populations, and the cohesiveness and distribution of species. The program, which will also include a networking reception, is open to professionals and members of the general public interested in science, in general, and in evolution and biology, in particular.

**Registration is required.** Please RSVP at <https://ecusabostonjan2015.eventbrite.com>. *This program will be in English and refreshments will be served.*

We look forward to seeing you!

The ECUSA-Boston Team.
